

WATERSTALL  
SERIES

Model 03B in Oil-Rubbed Bronze with Butt-Glazed Corner

## MODEL 03B DOOR, PANEL & BUTTRESS PANEL

Customization is a design element, not an afterthought for WaterFall's most versatile enclosure - Model 03 and 03B. The unit may be installed with the door and both panels on the same level (Model 03) or the return panel is easily configured to replace walls at the end of a tub or vanity to provide a more open and spacious look. The sidelite panel is not limited to rectangular glass, it may be notched to accommodate the ever-popular shower seat or to replace the corner post with the clean lines of a glass-to-glass corner, or both. Complete this palette of design options with any of WaterFall's framed, semi-frameless or patch hinge doors. All Model 03 and 03B units install with overlapping/telescoping joinery for clean lines and maximum waterproofing.
