

SLIDING SERIES

Model 11 with Return Panel in Oil-Rubbed Bronze

MODEL 10/11 HEAVY GLASS SLIDER

Waterfall's Model 10 / 11 Heavy Glass Frameless Slider represents the top-of-the line in frameless sliders. The rigidity of the 3/8" tempered glass combined with the heavy-duty header allow much larger unit widths and heights while maintaining the ease of operation afforded by the ball bearing rollers mounted not on, but through the glass. Each wall jamb is "Pocketed" for clean styling and to ensure the inside panel is always closest to the shower head for maximum waterproofing. Tubular towel bars are also mounted through the glass. The Model 10 / 11 may be tailored to include in-line and return panels and with the addition of concealed clips in the header, the door may be installed with no wall jambs for even cleaner lines.
