

PIVOT & HINGE  
SERIES

Shown in Brushed Nickel with Clear Glass

## MODEL 30D CONTINUOUS HINGE DOOR

Waterfall's Model 30D brings clean lines and contemporary styling to showers up to 36" in width. The tempered glass panel features polished edges and holes drilled in the glass prior to tempering to accept the thru-the-glass pull handle. Model 30D opens effortlessly on a unique continuous hinge design and closes securely with a magnetic closure. A clear acrylic drip across the bottom of the door and a clear vinyl seal in the strike jamb keep the Model 30D watertight.
