

SLIDING SERIES

Model 65 In Polished Silver with Clear Glass

## MODEL 64/65 FRAMED SLIDER

WaterFall Model 64 and 65 Framed Sliding Enclosures offer a more traditional unit with fully framed panels complimented by dual towel bars. The matching pull does double duty – it opens the doors smoothly and quietly while also creating an “anti-reverse” feature so the inside panel is always positioned closest to the shower head for maximum waterproofing. Model 64 and 65 are easy to clean thanks to WaterFall’s open-track design. Return panels and In-Line Panels may be added to accommodate “Buttress” conditions.
