

Some applications are best suited for a door that pivots. WaterFall meets this need by mounting pivot hinges directly into a matching "Heavy Glass Header" created from extruded aluminum and finished in an anodized or powder-coat finish perfectly matched with WaterFall hardware. Specially designed brackets attach the header to the wall with no visible screws.

Wall to Glass Clip Detail

Some Heavy Glass doors hinge, some pivot. For added versatility, WaterFall offers two distinct lines of sliding Heavy Glass enclosures.

Our Model 10/11 Heavy Glass slider for tubs and showers allows two 3/8" Tempered Glass panels to slide freely across openings up to 80". In-line panels and return panels may be added for shower seats and buttress conditions. Reference the Model 10/11 literature for more details.

WaterSlide is a unique alternative to conventional sliding doors. The door slides behind a fixed panel which adds support to the 1-3/8" diameter header. Return panels may be added for additional flexibility. Reference the WaterSlide literature for more details.

HEAVY GLASS SOLUTIONS

You've successfully designed and built your dream shower with the best tile, granite or marble, the latest in fixtures and a configuration that complements your bathroom. You made a lot of tough decisions along the way. Now for the easy decision: let WaterFall configure the perfect glass enclosure for your shower. Our experienced staff will ensure the tempered glass panels are perfectly sized, the WaterFall hardware meets the structural demands of your enclosure and our stylish brass hinges and pulls complete the modern look. The finished product is a one-of-a-kind enclosure that keeps the water inside while allowing the beauty of your shower to shine through.
