

SLIDING SERIES

Shown with 90° Return Panel

## HARMONY HEAVY GLASS SLIDER

The clean, sleek lines of the Harmony by Waterfall provide a minimalist yet visually appealing look. Four oversized rollers operate seamlessly on a heavy-duty stainless steel tube. This perfectly balanced precision roller system leads the industry in functional design creating a truly open and contemporary appearance. The Harmony maximizes floor space with its sliding door and stationary panel providing ample access in applications with toilet or vanity obstructions. Harmony also lends itself to countless custom configurations including one or two 90° returns, pony walls, notched panels, and out-of-square conditions. Exposed adjustable bumpers add to the sleek styling and allow you to set the stopping points of the sliding door. Choose from a recessed pull or 8" ladder pull.
